Configuring Identity and Access Solutions with Windows Server 2008 Active Directory

Summary

Duration 3 Day(s)	Vendor Microsoft	Category Networking
-----------------------------	----------------------------	-------------------------------

Introduction

This three-day instructor-led course provides the knowledge and skills that IT Professionals need to configure identity and access solutions with Windows Server 2008 Active Directory. The audience for this course is IT Professionals interested in learning how to implement IDA solutions in an enterprise environment. Most students will be IT professionals who are responsible for integrating applications and platforms with enterprise directory and security services while increasing access to a growing number of customers and partners.

Prerequisites

This course requires that students meet the following prerequisites:

- Technical knowledge equivalent to 6424: Fundamentals of Microsoft Server 2008 Active Directory
- Technical background knowledge and hands-on experience of Active Directory Domain Services (AD DS from the AD TS foundation exam). This includes technical knowledge equivalent to 6425A: Configuring Windows Server 2008 Active Directory Domain Services

Course Objectives

After completing this course, students will be able to:

- Describe identity and access solutions.
- Configure Active Directory Certificate Services.
- Deploy and manage certificates.
- Configure Active Directory Lightweight Directory Services.
- Configure Active Directory Federation Services.
- Configure Active Directory Rights Management Services.
- Maintain access management solutions.
- Troubleshoot identity and access solutions

Associated Certifications & Exams

On successful completion of this course students will receive both a Microsoft and Torque-IT attendance certificate. Exam TBA.
