

SA-200

Intermediate System Administration for the Solaris 10 Operating System

Summary

Duration

5 Days

Vendor

SUN

Introduction

The Intermediate System Administration for the Solaris 10 Operating System (Solaris 10 OS) course provides students with the necessary knowledge and skills to perform essential system administration tasks in the Solaris 10 OS, such as installing software, managing file systems, performing system boot procedures, performing user and security administration, managing network printers and system processes, and performing system backups and restores. This course is the second of a two-part series that individuals take in preparation for Part I of the Sun Certified System Administration for Solaris OS examination.

Prerequisites

To succeed fully in this course, students should be able to:

- Perform basic UNIX tasks
- Understand basic UNIX commands
- Use the vi text editor
- Interact with a windowing system

Course Objectives

After completing this course, students will be able to:

- Manage file systems
- Install software
- Perform system boot procedures
- Perform user and security administration
- Manage network printers and system processes
- Perform system backups and restores

Associated Certifications & Exams

After:

Once delegates have completed SA-200 they may attempt on of the following:

- Advanced System Administration for the Solaris 10 Operating Environment (SA-202-S10)
- Shell Programming for System Administrators (SA-245)
