

Torque IT's winning streak

CONTINUING ITS WINNING STREAK WITH MICROSOFT, TORQUE IT IS THE FIRST LEARNING PARTNER TO ACHIEVE GOLD STATUS WITH MICROSOFT GLOBALLY ON ITS NEW PARTNER MODEL. THIS GOLD STATUS IS MEASURED AGAINST A GLOBAL STANDARD PLACING TORQUE IT IN AN ELITE GROUPING OF TRAINING ORGANISATIONS AROUND THE WORLD.

Morne Hugo and Anneline van Rooyen, Torque IT

"We're confident that throughout Africa we'll be able to meet the new, and extremely arduous, requirements permitted to aggregate the volumes and certifications that pertain to organisations in the region," states Anneline van Rooyen, sales director at Torque IT. Over 100 Microsoft courses are conducted monthly by Torque IT and the stringent Microsoft KPIs ensure the training centre conducts these courses to a high standard.

For the second year in a row Torque IT has won Microsoft's Learning Partner of the Year award.

Over the past 22 years Torque IT has been keeping abreast of software developments, ensuring it offers a range of training suited to every company's requirements, from standard operational training to designing customised training of Microsoft products specific to a designated project being implemented.

Adds Morne Hugo, Microsoft business unit manager of Torque IT: "Our strength is adapting the training programme to suit the needs of the client. Companies looking for project-driven requirements approach us to customise the training, which is specific to their needs. This is conducted in conjunction with Microsoft's programme requirements, while also being specific to the customer's requirements."

Learning is our passion

Instructor-led training leads the way in building relationships, cultivating skills and creating leaders of the future. International certification is always promoted, which leads to better industry reputation and competitiveness for both current and future generation of IT professionals.

Completely customisable training and enablement solutions tailor-made to specific requirements are offered to customers, while retaining the quality and credibility associated with vendor authorised training courses.

Training is delivered in a practical and theoretical environment through the use of hands-on-lab, vendor-accredited courseware and interactive class discussions, overseen by a team of internationally certified instructors.

Leading through innovation

"We remain an innovator in the learning space and have worked closely with Microsoft on new and unique learning solutions. These solutions showcase us as being one of only a handful of partners globally with the necessary skills, and the only one in South Africa," says Van Rooyen.

Torque IT has a wide and far-reaching offering in the marketplace that provides solutions across four training spheres: in-class instructor-led training, virtual instructor-led training, self-paced learning and digital learning. "Every client has a training objective and a preferred learning methodology and we can adapt by providing either a single or blended learning experience," Hugo adds.

The following innovative training solutions form part of Torque IT's ever-growing training capabilities in its quest to provide richer learning experiences and constantly improve results

- Training in a box (onsite training, anytime, anywhere)
- Microsoft MOC on-demand (self-paced training solution)
- Virtual instructor-led training (VILT)
- Digital learning platform (MOOC training solution)
- Unique Microsoft SATV proposition
- A rolling six-month public schedule
- Tailored and customised training propositions
- Assessment solutions
- International exam centres
